## PC-LIKE TRANSLUCENT

(ADVANCED HIGH TEMP)

Supplier Data Sheet: [Accura 5530](#)

### PRODUCT DESCRIPTION

PC-Like Translucent (Advanced High Temp) is best used for parts that need strength and stiffness combined with high temperature resistance. With a thermal post-cure, the part's heat deflection can be improved even further, but at the expense of durability.

### APPLICATIONS

Advanced PC-Like High-Temp Translucent works well for parts that require high temperature resistance such as under-the hood-automotive or electrical components.

### KEY PRODUCT BENEFITS

- High temperature resistance
- Higher resistance to heated fluids
- Translucent

### TOLERANCES

For parts that are built in High Resolution (HR): The tolerances for well-designed parts are in the X / Y direction ± 0.05mm plus an additional ± 0.001mm / mm; In Z direction ± 0.13mm plus additional ± 0.001mm / mm. For parts that are built in Normal Resolution (NR): The tolerances for well-designed parts are in the X / Y direction ± 0.1mm plus an additional ± 0.001mm / mm; In Z direction ± 0.13mm plus additional ± 0.001mm / mm. Note that tolerances may change depending on part geometry
